Uses of Digital Devices 1

Task 1

Education & training makes heavy use of digital devices. In the table below, identify three example devices used in your school education, and what they're used for. **(7 Marks)**

Device	Use
Keyboard	Keyboard is an input device and could be used for typing in lessons, for online research and our emails.
Monitor	This is an output device and it is used for displaying text, graphics and images which is useful for our educational purposes such as reading or revising.
Printer	A printer could be used by a teacher to print out work for the class which is useful for educational purposes.

Task 2

Our personal lives have been changed through the use of digital devices. In the table below, identify three example devices used in your personal lives, and what they're used for. **(7 Marks)**

Device	Use
Mobile Phone	We use mobile phones for entertainment such as contacting friends and family, watching videos, and listening to music.
Personal Laptops	We use our personal laptops for work, streaming movies and shopping online.
Storage Devices	Storage devices like hard drives are used so that we can save important documents or pictures in the device so we cannot lose them.

Task 3

Our social lives have also been changed through the use of digital devices. In the table below, identify three example devices used in your social lives, and what they're used for. **(7 Marks)**

Device	Use
Digital Camera	We use digital cameras to record or take a photo of some part of our life and post it on social media
Laptop	Laptops could be used to communicate with your relatives or

	friends.
Tablet	Can use it to access social media.
